Product Specification Data

DCM ARTISAN CANVAS REMOVABLE VINYL

Facestock: White, Flexible, Textured Vinyl

DCM's Artisan Canvas removable vinyl is thick, textured stock that mimics the look and feel of a painter's canvas. Artisan Canvas exhibits the same removability/repositionability of our classic Magik-Stik, but adds new layers of richness and complexity to your prints due to its textured feel.

Artisan Canvas is available in a 6.0 mil, white, textured facestock.

Adhesive: Proprietary Removable/Repositionable System

DCM's Artisan Canvas features our Magik-Stik adhesive system; a proprietary, water-based formulation that is perfect for applications that require both superior tack and clean removability. This adhesive works great on a variety of surfaces such as painted drywall, glass, metal, sanded wood (w/o lacquer), and most any non-textured or non-porous wall.

The minimum application temperature for DCM Artisan Canvas is 40°F, with a service temperature range of 40°F to 120°F.

Liner:

DCM Artisan Canvas is available on a 92# double-sided, poly-coated liner.

Stocked Liners

		50#	78#	83#	92#	8 Pt.
Facestock:	6.0 Textured White				X
