

Magik-Stik™ Vinyl Application Instructions

1. Clean application surface using warm water only and allow to sufficiently dry. Not recommended for use with any chemical cleaner.
2. Do not pre-wet the surface prior to application as this will reduce the adhesive properties of the decal.
3. Product designed to work on smooth surfaces such as painted drywall, glass, and smooth painted metal. This material is not recommended for unpainted drywall, brick, textured wallpaper or drywall, or any other textured surface. We recommend that you test our product for its intended use to ensure suitability.
4. Remove decal from liner paper and apply to surface while smoothing out air bubbles as you go. If needed you can reposition decal and start over if not lined up properly.
5. Use squeegee to force the remaining trapped air bubbles from the center of the decal outward.
6. Decal will remain in place until peeled off.
7. Product can be stored on original backing paper for future use.
